

Monday Morning Memo - Mar 23, 2020

[This weeks ARES net control is Tony N9UN
This weeks Skywarn net control is Matthew W9SOX

Commentary

As we are getting into the severe weather season, make sure your family has an emergency plan. Last week was Severe Weather Preparedness Week and there are plenty of tips and ideas that you can still consider including:

- Identify the safe space to go to in your workplace and your home in case a tornado warning is issued. Stock this space with flashlights, bottled water, snacks, etc.
- Make sure you have a weather radio with fresh batteries, or that your phone is fully charged throughout the day so that you can receive any weather alerts if severe weather is likely
- If a tornado warning is issued, go immediately to your safe place and monitor the weather via your phone or weather radio until the all-clear is given for your community.

Coming Up

~~Mar 15-21 Indiana Severe Weather Preparedness Week~~

April 02 Planning Meeting - Conf call

April 08 MC ARES Monthly Field Meeting as a net

- **Please note that remaining Spotter Training from NWS has been postponed. You can find Spotter Training information and webinars at <http://www.weather.gov/ind/>**

Weather/Skywarn Outlook

Temperatures will be warmer and highs into the 60's most of the week. Canadian high pressure will move into the lower Great Lakes. Thunderstorms are possible Tuesday and Tuesday night over south central parts of central Indiana and again Thursday afternoon through Friday night over all of central Indiana. It is too early (as of Monday March 23) to tell if there will be potential for severe weather. Heavy rainfall is possible at times late Thursday through Friday night.

Spotter and Net activation is not anticipated, but conditions may change. Always be weather aware!

Happy Spring, keep your distance and 73
Matthew - W9SOX
